Explorer Kit Rides

Ages 0-1

Wallaroo

Ready to take the first steps of your life? The Wallaroo is there for you! The back caster wheels make it easy to change the direction as you go along, and they can even be tightened to provide a bit more stability in the beginning. The big front wheels make the ride super stable and the crate offers plenty of room to take your favorite toys with you. With the Wallaroo you'll be running in no time.

Ages 1-2

Turtle

Did your little one just start walking? Then let him or her jump on the back of the Turtle. With a sturdy, soft-grip handlebar and comfy seat your child will feel comfortable to start moving around using the legs. The front caster wheels ensure they can steer easily and start exploring! Our Turtle will make it easy. As long as you're not in a rush, of course ;)

Ages 2-5

Rider

Our Rider has evolved, meet the new version! The three big rubber wheels ensure a smooth, stable ride inside and outside. With a low center of gravity, this sturdy and beautiful walker tricycle is the perfect ride to build after your kid has outgrown the Turtle. Keep on moving!

Ages 3-7

Zigzag

This is yet another unique creation. Put your feet on the profile. Place hands on the handlebars. Zig. Zag. Zig. Zag. Because of the weight distribution and caster wheels you start moving forward like magic. And it doesn't stop here :-). Want to go faster? Get your hex key, change the angle of the front profile and you gain more speed right away.

Ages 3-7

Streamer

Our Streamer invites you for a ride! Place your feet on the front aluminum profiles and start moving them. Once you get some speed it's time to steer using your hands. The silicone wheels ensure a smooth ride and fun times!

Ages 3-7

Cyclone

Place your feet on the front aluminum profile and push forward one foot at a time. Wiggle, wiggle. Thanks to the ingenious angle of the front caster wheels, you will start moving forward immediately. Ready for the next level? Gain speed. Put your feet on the profile. Use your hands to turn the handlebar at a sharp angle and start spinning like a cyclone!

Ages 3-8

Gecko

This ride might be tiny but it supplies unlimited indoor fun. To start going forward simply place your knees on the pads and move handle from side to side. And voila, in no time you are moving like a tiny gecko around the house.

Ages 4-8

Caterpillar

How can you put this crazy Caterpillar in motion? Just sit back in your seat, place your hands on the aluminum profile, put your feet on the handlebars at the front and start wiggling them from side to side. Once the swivel motion propels you forward like magic, it's time to make your own obstacle course...! Let your feet steer you around the kitchen island and behind the chairs and don't forget to turn right at the hallway!

Ages 4-8

Flowmotion

The Flowmotion provides a fun and unexpected way of zooming around. Just put your legs on the back pads and start swaying your hips! The magic combination of your weight moving from side to side and the caster wheels on the back will let you go forward immediately. In for even more action? Try mastering the 180 or even 360 degrees turn!

Ages 4-8

Breeze

Can you feel the soft summer breeze? Our 3-wheeled scooter is equipped with our patent-pending lean-to-steer system. Simply lean in the desired direction and the Breeze will follow. Thanks to its Stabilizr® system, the Breeze will immediately reverse into its default position once you stop leaning. Want to enjoy an ice cream? The stainless steel front brake ensures a quick stop.

Ages 6+

Funboard

This 3 wheel skateboard is a fun twist on a classic ride. In front you have two high quality silicone wheels that ensure a super smooth ride. In the back there's a larger wheel which minimizes friction and lets you cover great distances in no time. The front Stabilizr® system makes it easier to steer by simply leaning right or left. Are you ready to amaze your friends with this cool ride?
